FRIDAY, FEBRUARY 10, 1905.

President Dunlop, of the Capital Traction Company, was asked by this

I don't think it is any business of The Times what we do with our cars, but I will state that as soon as we can get our cars through the shops we will equip them with vestibuled fronts.

This rather compels a statement they are understood by The Times.

Mr. Dunlop's attitude is not unparalleled. The attitude has extra significance in this instance, however, because it is expressed by a citizen of enviable business standing, the head of a street car company which provides a generous and regular service, and an important figure in many movements for the municipal advantage, in which The Times is glad to co-operate.

The newspaper attitude-that is, public's approval-is that, when it perceives a wrong which makes the level. people or any part of the people sufbest mouthpiece these people haveand one of the greatest influences their injury. The post is, of course, one of great responsibility. It carries with it a need for the keenest and interest of all the people. It requires an honest and unbiased judgment. And whenever the judgment of the newspaper is given a slant by any other interest than the true interest of the whole people who constitute its readers the editors of that paper are guilty of a shameful and oftentimes disastrous breach of trust.

In every matter which involves the people, either as individuals or in the more obscure relation of the public to institutions like street car companies, the newspaper must choose its course in the light of its responsibility to the people. Its duty is to consider how best it can serve the people-without regard to advertisements, offices, money, or fear of misjudgment.

This is what makes it a newspaper's business if a street car company fails to protect its employes against the extremes of the weather. This is what makes it a newspaper's busi-
